

Application No. 10/646,854
Response to Notice and Amendment After Final
November 30, 2007

REMARKS/ARGUMENTS

Entry of this amendment will place the application in condition for allowance, thereby removing any need for further action with respect to non-compliance of the Appeal Brief previously filed herein.

An appeal was taken herein from the final Office Action mailed 01/27/2005. That Action allowed Claims 5-10 and 14-19, but rejected Claims 1-4, 11 and 12. Claims 1-4, 11 and 12 are cancelled by this amendment, leaving only the allowed claims.

This amendment also amends the Specification to identify the serial number, previously left blank, of copending application Serial No. 10/647,931, entitled "A Reconfigurable Topology for Switching and Charge Pump Negative Polarity Voltage Regulators," and referenced in paragraphs [0001], [0050], [0057] and [0061] of the Specification.

Accordingly, request is made for entry of this amendment, and allowance of the application as amended.

Respectfully submitted,

/Warren L. Franz/
